just seeing that BizOps deck I mentioned yesterday...attached...for my stuff, their numbers seem generally right...their conclusions seem okay, nothing earth-shattering...

btw, the 2M ebook number for AMZN has a ton of vanity press crap in it (self-published) where they make no money, and also counts PD...our 1.3M is paid-for content only from actual publishers (as opposed to my mom, who thinks she's a poet)...if we counted PD, we'd be at over 4M
